End Application:

F100-pw-100/200/220/220e

Criticality Code Justification:

Agav

Nominallength:

7.000 inches

Product Name:

Fixture, machining - flap, inlet guide vane

Nominalwidth:

4.000 inches

Functional Description:

Used to hold the igv flap small trunion end (inboard) and maintain critical runout requirement

Reference Data And Literature:

Serd 6480

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
