**End Application:**

F118-ge-100

**Criticality Code Justification:**

Agav

**Nominallength:**

13.000 inches

**Product Name:**

Fixture, machining - front frame shroud assembly

**Nominalwidth:**

8.000 inches

**Functional Description:**

Required to machine shroud holes to rework the front frame shroud assembly for the re-designed wear bushing

**Reference Data And Literature:**

Serd 6399

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
