End Application:

Servocylinder test station

Product Name:

Encoder, motion converter

Special Features:

Encoder consists of 2 main parts, a rotary encoder model h-25 series and a motion translator model pt8600; both units are aligned and bolted together

Functional Description:

Linear encoder used to measure the position of the ram on a linear hydraulic actuator

Material:

Aluminum and stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
