End Application:

C-17 aircraft

Product Name:

Adapter kit, hydraulic system, fuselage jacking

Special Features:

C/o 3 h style adapters with hoses and quick disconnect assemblies for connection to the tripod jacks and the hydraulic pump unit

Functional Description:

The adapter kit is used to equalize the pressure in the tripod jacking system for raising and lowering the fuselage during testing and maintenance

Reference Data And Literature:

Serd 110657, t.O.1c-17a-2-07

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
