Overall Length:

10.166 feet

Overall Height:

2.666 feet

Overall Width:

4.833 feet

Assembly Form:

Knocked-down

End Application:

Tf-39 aircraft engine

Work Holding Device Position Adjustability:

Nonadjustable

Product Name:

Stand, sub-assy-fan rotor disks

Special Features:

Welded steel construction; supports 9666m40g02 rotor & 9383m91p02 disk; gray painted base; black oxidized steel and anodized aluminum components

Functional Description:

Supports and facilitates rotation of fan rotor assembly and stage 1 disk assembly in horizontal position

Reference Data And Literature:

Serd 1622

Relationship To Similar Equipment:

INCO-RP-ORA-TESK

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-c
