End Application:

F16A-IR-CRA-FTCO

Special Features:

Includes a laser diode, polarizer, and three lens elements; stored in etms transit case

Functional Description:

Produces a collimated beam of linearly polarized light, wherein the optical axis of the collimated beam and the plane of polarization of the beam provide a reference in three axes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
