End Application:

Testing shop equipment

Product Name:

Pna network analyzer

Special Features:

Pna network analyzer; 10mhz to 20ghz, 2 ports; 123db dynamic range and below 0.006db trace noise; below 26 usec/point measurement speed, 32 channels, 16001 points; trl/lrm calibration, on-wafer, in-fixture, waveguide, and antenna measurements

Special Test Features:

This product will be discontinued february 28, 2009; recommended replacement product is e8362c

Supplementary Features:

Mixer conversion loss, return loss, isolation, and absolute group delay; amplifier gain compression, harmonic, imd, and pulsed-rf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
