End Application:

Air reconnaissance

Product Name:

Precision dme (dme/p) test set

Special Features:

Peak power direct: 50 ohm; cw power: 50 db below direct; test set consists of the following: cpu board, arinc-429, mil-std-1533 and gpib-488 interface boards, rf assembly, panel assembly, hard drive, power supply, rf switches, attenuators and circulators; rf interface printed circuit board

Functional Description:

To simulate the operation of the dme ground station and to check on the operation and performances of a dme/p aircraft interrogator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
