End Application:

F100-pw-100/200/220/220e aircraft engines

Nominallength:

12.000 inches

Product Name:

Support, rear-hpt

Nominalwidth:

12.000 inches

Nominalheight:

9.000 inches

Functional Description:

Used to hold and support the high pressure turbine when removing or installing the 1st stage turbine blade front retainer, air seals, and blades after the hpt rotor is fully assembled

Reference Data And Literature:

Serd a361

Relationship To Similar Equipment:

Supercedes pwa500726 and pwa57195

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
