Mounting Type:

Rack

End Application:

Brat b511-100 air data test set system

Portability:

Portable

Criticality Code Justification:

Ftld

Product Name:

Air data test set

Special Features:

Static pressure output 0-32.15in hga; total pressure output -0.5 to 73.55in hg; ten different display screens provided; 0.010pct fs accuracy; 0.003pct fs pressure precision; color screen; simultaneous display of ps & qc, or ps and pt

Functional Description:

Used to test and calibrate air data instrumentation for altitude and airspeed and change rates of them

Reference Data And Literature:

To 33d7-3-436-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T179-x
