Furnished Items:

Interface test adapter; ten cables; two extender cards; resistor load box; holding fixture; self test fixture

End Application:

B1BA-CF-TSP-OILE

Component Document Origin:

Industrial

Document Source:

43999

Document Type:

Support equipment requirement sheet

Component Document Page Number:

3

Document Identification:

14j95c0165

Product Name:

Spoiler controller test program set

Functional Description:

Used to fault isolate and test the spoiler controller

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
