End Application:

B-1b

Product Name:

Tps, ind, fuel qty

Special Features:

It is recommended that a new test program set be developed and utilized to fulfill the functional analysis requirement of this support equipment requirements data the interface test adapter (ita) provide the electrical path for stimulus and measurement signals between the advanced digital test station (adts) and the unit under test (uut) software program that contains the codes which, when executed by the adts, provides a set of test operation sufficient to perform functional verification on the uut.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
