End Application:

Ground support equipment

Product Name:

Bearing analyzer

Special Features:

The analyzer facilitates determination of quality of bearing working surfaces. The bearing is operated in accordance with controlled conditions of load and speed to produce composite noise signal; magnitudes of noise signal are measured and compared to previously established acceptance levels applicable to the particular type of bearing being tested

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A528p0
