End Application:

Ground support equipment

Product Name:

Forcetek nose cap

Special Features:

Item is 0.312 oversize with class of fit 1. Often jaw sets are combined with nose cap to form a nose cap assembly and jaw set. Jaw sets are designed to last for many installations; however, if they become worn, the sleeve may slip inside the inner jaw during installation. Both worn jaws should then be replaced.

Functional Description:

The nose cap which is threaded onto the barrel of the puller unit is designed to allow the retainer flange to be pulled flush during installation. It also holds the sleeve in place during processing and reacts the pullig force back into the parent material.
