End Application:

P-8

Criticality Code Justification:

Agav

Product Name:

Tester, dbfs, suppressor, test/fault isolator

Special Features:

Used to measure wiring resistance between siu and squib, check squib wiring from siu for stray voltages, and check fire suppressor pressure switch wiring; includes: testbox. Calibration cable, storage box

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
