**End Application:**

P-8

**Criticality Code Justification:**

Agav

**Product Name:**

Tester, dbfs, suppressor, test/fault isolator

**Special Features:**

Used to measure wiring resistance between siu and squib, check squib wiring from siu for stray voltages, and check fire suppressor pressure switch wiring; includes: testbox. Calibration cable, storage box

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
