Overall Length:

4.000 inches

End Application:

Direction finder sets an/srd-503 and an/srd-504

Special Features:

Up to 50 percent more compensation; 25-50 percent less pressure drop than competing unit; victaulic ends for ease of installation; two sets of pressure ports; one needle valve standard, second optional

Functional Description:

For use in fueling systems where it is desirable to accurately control the pressure into an airplane fuel system at the underwingnozzle; provides a convenient point to control pressure and compensate for the pressure loss of the plumbing between the venturi and the underwing nozzle

Material:

Aluminum alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
