Product Name:

Handfueller

Special Features:

Age600s gp12vdc, 600 gallon aircraft ground equipment handfueller service cart, with secondary containment, and fillrite pump/meter. The handfueller consists of an inner tank assembly and an outer tank. Fuel servicing is accomplished with a 12 volt dc pump, fuel meter, fuel filter, and a plumbing system that allows for the direction of fuel into or out of the inner tank assembly based on the method of fuel service selected. The handfueller is also designed to allow for non fuel related serving of aircraft ground equipment.
