End Application:

F-16 aircraft

Product Name:

Mirror assembly, calibration

Functional Description:

Used to provide a method for establishing that the yaw and pitch axis of optical bench are aligned in respect to the lru mounting provisions on the optical bench within angular tolerances no greater than 1/5 of the lru test tolerances (appx. 10 arc-seconds)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
