**Special Features:**

System has three main cables that interface to the tank's fire control & power system. The functional test unit connects to these cables for a system test, or individually to trouble shoot the cable & devices connected to it. The functional test unit utilizes a 5v & 28v power supply, simple mechanical switches (a rotary & 9 pushbutton), indicators & a trigger circuit to develop a 0.100ms pulse

**Shelf Life:**

N/a
