Overall Length:

24.000 inches

Overall Height:

29.000 inches

Overall Width:

11.000 inches

End Application:

Aim-9 sidewinder missile

Product Name:

B.T. Crystal installation fixture

Special Features:

Consists of a forward rocker arm support and an aft rocker arm support; a gas actuated cylinder located at the back of the installation fixture is used to apply a 1000 lb force to the pivot plate. Cylinder piston is controlled by a selector federal from a 1500 psi dry nitrogen or air supply; another cylinder, mounted vertically on top of the fixture has a special tip; shop air 80-100 psi used to return cylinders to starting positions

Functional Description:

Used to assemble the piezoelectric crystal with aluminum ring into the forward and aft rocker arm cavities

Reference Data And Literature:

33da-1-122

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
