End Application:

Missile Igm-30

Product Name:

Window, sidereal

Functional Classification:

Aa-7.1

Functional Description:

Ditem of depot maintenance ground equipment designed to allow the establishment of a line-of-sight from polaris through the exterior facility wall to a theodolite with a of refractive error

Entry Date:

70-7-1

Relationship To Similar Equipment:

Optical sight window nsn 4935007812487

General Description:

Assembly of glass panes 2, evacuated chamber 1, motor 1, drive mechanism 1, protective cover 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
