End Application:
Missile Igm-30
Product Name:
Window, sidereal
Functional Classification:
Aa-7.1
Functional Description:
Ditem of depot maintenance ground equipment designed to allow the establishment of a line-of-sight from polaris through the exterior facilit
wall to a theodolite with a of refractive error
Entry Date:
70-7-1
Relationship To Similar Equipment:
Optical sight window nsn 4935007812487
General Description:
Assembly of glass panes 2, evacuated chamber 1, motor 1, drive mechanism 1, protective cover 1
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
