End Application:

Missile Igm-30

Product Name:

Test set, discrete test assembly

General Description:

Assembly of chassis 1, support equip 1, guide board 1, chassis cover 1, panel 1, multivibrator board 1, delay network board 1, amplifier board 1, output driver board 3, detector network board 1, and gate board 1, detector board 1, flip flop board 1, power supply 2, switch 3, connector 13, diode 4, terminal board 1, fan 1, socket 1, resistor 5, lamp 7, light 7, fuse 3, fuse holder 3, terminal 44, knob 1, jack 4, slide 1, handle 3, cable 2 and related hardware

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
