End Application:

Missile Igm-30

Product Name:

Optical sight window

Functional Classification:

Aa-7.1

Functional Description:

Npart of electro-optical system that provides an azimuth reference which serves as a standard to evaluate the ability of a minuteman 3 guidance system to determine true north during self alignment technique testing

Entry Date:

73-5-15

Reference Data And Literature:

Standart parts list p/n c4-1528/319, installation drawing p/n 17958, bulletin b-2732 page 50 and 51 of globe industries, model specification no. S-133-132-4-577

Relationship To Similar Equipment:

Similar to sidereal window nsn 4935004356207ah

General Description:

Assembly of 1 window p/n 67660-707-1, 1 door p/n 68820-707-1, 1 loose equipment p/n 68824-707-1

Type/model Designation:

Se478a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
