End Application:

Missile Igm-30

Product Name:

Optical wedge

Functional Classification:

Aa-7.1

Functional Description:

Used to deviate a 1 1/2 inch dia. Collimated light beam through an angle of 5 (plus 2, minus 1) arc seconds alternately 1n a clockwise and counterclockwis direction

Entry Date:

73-5-15

Reference Data And Literature:

No. 67640-707-1 opticle wedge, no. Aa0209-082 opticle wedge, no. 17945 installation drawing, no. D20189-111 autonetics interface doc, no. 20199-111 and 20195-111 autonetics interface

General Description:

Assembly of 1 optical wedge p/n 334-0039-001, 1 drive unit p/n 331-0024-001 and related hardware

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
