End Application:
Missile Igm-30
Product Name:
Optical wedge
Functional Classification:
Aa-7.1
Functional Description:
Used to deviate a 1 1/2 inch dia. Collimated light beam through an angle of 5 (plus 2, minus 1) arc seconds alternately 1n a clockwise and
counterclockwis direction
Entry Date:
73-5-15
Reference Data And Literature:
No. 67640-707-1 opticle wedge, no. Aa0209-082 opticle wedge, no. 17945 installation drawing, no. D20189-111 autonetics interface doc, no
20199-111 and 20195-111 autonetics interface
General Description:
Assembly of 1 optical wedge p/n 334-0039-001, 1 drive unit p/n 331-0024-001 and related hardware
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
