Overall Length:

16.500 inches

Overall Height:

10.000 inches

Overall Width:

11.000 inches

End Application:

Missile aim-9j1, sidewinder

Product Name:

Cylinder block drill jig

Special Features:

Consist of a base plate and a machined locator plate and drill sleeves which is aligned using the tooling points established during original fabrication of the cylinder block

Functional Description:

Used to position and hold servo cylinder block assembly for modification

Reference Data And Literature:

33da-1-122

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
