Overall Length:

18.000 inches

Overall Height:

12.000 inches

Overall Width:

14.000 inches

End Application:

F-15 acft; aim-9 sidewinder

Special Features:

Provides switching for the following functions: jettison firing, master arm, cool, r-l ref., acq, lock-on and uncage; load simulation for the audio signal, and circuitry to check power interlock, ground, mux disable and missile id.

Reference Data And Literature:

Serd no. 3485

General Description:

Simulates aircraft weapon control functions to verify the launcher & power supply voltages are within tolerance, that the firing sequences are correct & the firing circuits & launcher wiring are working properly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
