Furnished Items:

Vacuum gauge; guidance unit adapter; mass spectrometer vacuum system; fill and leak purge test set

Component Quantity:

4

Special Features:

115vac, 60 hz, single phase

Functional Description:

Used to provide evacuation equip controls regulate purge and fill operation, leak detection equip, and holding equip reqd for operation

Entry Date:

88-10-01

Supplementary Features:

Operating temp 72 degrees f., 23 degc.; operating humidity 50 percent relative; power consumption electrical/pneumatic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
