End Application:

Agm-129

Product Name:

Alignment set, engine inlet lip

Special Features:

Alignment kit consists of punch, transfer p/n 40a95120-1; base plate assembly p/n 40a95941-1; positioner p/n 40a95952-1; pin assembly p/n 40a95955-1; body assembly p/n 40a95968-1; gage "go- no go" p/n 40a95971-1; drill plate assembly p/n 40a95972-1; depressor assembly p/n 40a95974-1; gage, plug 4083-65008-001; screw p/n nas1101e3-20

Functional Description:

The alignment set consists of the hardware needed to align the inlet lip on the end of the agm-129 and is needed for proper radar signal alignment

Reference Data And Literature:

T.O.33d3-11-50-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
