Current Type:

Ac

End Application:

Lgm-30 missile

Drive Type:

Electric motor

Installation Design:

Fixed

Power Source:

Electric motor

Engine Driven Hydraulic Pump Testing Design Feature:

Not included

Criticality Code Justification:

Agav

Product Name:

Static test set

Voltage In Volts:

480.0

Phase:

Three

Special Features:

65 l x 74 w x 75in h; 5000lbs; requires nitrogen, water, facility air pressure supplies in addition to electrical for operation

Frequency In Hertz:

60.0

Functional Description:

Supports dynamic build up, adjustment, and acceptance testing of auxiliary power supply pump assembly units under test and aps pressure switch subassemblies. Capable of static testing 5 units at one time

Reference Data And Literature:

Serd apstsu0003

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-e
