Current Type:

Ac

End Application:

Lgm-30 missile

Drive Type:

Electric motor

Installation Design:

Fixed

Power Source:

Electric motor

Engine Driven Hydraulic Pump Testing Design Feature:

Not included

Criticality Code Justification:

Agav

Product Name:

Aps test set

Voltage In Volts:

480.0

Phase:

Three

Special Features:

65 l x 74 w x 75in h; 5000lbs

Frequency In Hertz:

60.0

Functional Description:

Used to test dc motor mounted to aps hydraulic pump at 105 and 115deg f. Evacuates and fills uut w/hydraulic fluid and measures voltage, current, pressures, flows, temperatures, thermistor resistance, elapsed times, of 5 different models one at time

Reference Data And Literature:

Serd apstsu0001

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-e
