Ac Voltage Rating:

115.0 volts or 230.0 volts

Frequency Rating:

Between 50.0 hertz and 400.0 hertz

End Application:

Agm-65 maverick missiles

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Product Name:

Target simulator

Phase:

Single

Special Features:

Consists of seeker mounting unit, optics unit, and electronics unit; electrical power taken from an/dsm-157 or mts-206

Functional Description:

Target simulator supporting tv/ccd, ir, and laser seekers

Reference Data And Literature:

Manufacturer data

Relationship To Similar Equipment:

Replacement for an/dsm-129 and an/dsm-787

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
