End Application:

F-16a/b aircraft age.

Reference Data And Literature:

T.O. 1f-16a-4-4

General Description:

Measures fuel supply manifold pressure at the aircraft fuel system defuel receptacle. Fuel system incorporates electric powered fuel pumps and a hydraulic powered fuel flow proportioner which pressurizes the main fuel supply line. The adapter is required to perform confidence and fault isolation tests on the pumps and proportioner. Adapter is compatible w/ air force standard refuel and defuel receptacles
