Operation Method:

Manual

Venier Scale:

Not included

Tilting Feature:

Not included

Special Features:

Tech order name=maintenance fixture, receiver-collimator; ir receiver, lru-1 of the an/aaq-18 ir detecting set houses many cca's which require alignment and focusing after removal and replacement. A collimator is used for this purpose and this positioning table vertically adjusts the collimator to allow the optical center lines of the ir receiver and collimator to coincide; t.O. 33d10-47-15-4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
