End Application:

F100-pw-220/220e/229 engine

Special Features:

The press consists of a 10 ton arbor frame, hydraulic cylinder, and two dies. These dies are shaped to conform to the contour of the nose cone (per print) and when pressure is applied the nose cone can be returned to its original shape

Functional Description:

This press is designed to remove large dents from the anti-icing cone. Two dies are used to press the sheet metal back into tolerance. The force is supplied using a hydraulic cylinder

Reference Data And Literature:

Serd no.6593

General Description:

Press is 12.000 inches long, 6.000 inches wide, and 20.000 inches high and weighs 50 lbs.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
