End Application:

C-17 aircraft age.

Special Features:

C/o of two curvic couplings, one internally threaded, and a shouldered arbor with threads on the end opposite the shoulder; weight 3 lbs

Functional Description:

Used to adapt the second stage compressor impeller, p/n 3822068-2 to the work supports of a balance machine, p/n hl 12-1 (ta 824) to permit check balancing of the impeller to an accuracy of 0.005 ounce-inch in planes "l" and "m"

Reference Data And Literature:

Serd no. 240117

General Description:

2.880 in. Dia; 8.000 in. Long, materail - steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
