Installation Design:

Stationary

Abrasive Type Accommodated:

Dry

Abrasive Tank Compartment Type:

Double

Blast Hose Outlet Quantity:

2

Abrasive Tank Maximum Operating Pressure:

190.000 pounds per square inch

Instantaneous Blast Stop/start Valve:

Not included

Automatic Start Mixer Box:

Not included

Abrasive Adjustment Feature:

Included

Remote Control:

Not included

Special Features:

Microblaster system maintenanc (lox equipment)

Functional Description:

High pressure microblaster to remove rtv from lox regulator housings and for the removal of conformal coatings from avionics circuit cards

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T276-c
