Mounting Type:

Bench

Current Type:

Dc

End Application:

B-2

Power Source:

Electric motor

Product Name:

Torque test stand

Special Features:

An electrical power requirement of 28 volts dc and 10 amperes capacity must be applied to the e-m antenna actuator electrical connections

Functional Description:

To test and measure the full range of power on an overhauled and reassembled e-m antenna actuator

Reference Data And Literature:

Serd 3497

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-f
