Accessory Components And Quantity:

6 in dial test gauges 4; cutout valves 4; low pressure supply valve 1; air supply valve and gauge 1; nitrogen supply valve and gauge 1; nitrogen to gas booster valve 1; I.P. Regulator and gauge 1; booster regulator and gauge 1; test chamber with lexan shield 1; machinist vise w/swivel base 1; 20 gal stainless steel water tank with drain and lid 1; 2200 psi gas cylinder with supports 1; test hose w/quick disconnect 1; gas booster 1; storage drawers 2; pipe thread adapters w/male quick disconnect plugs and dust caps 10

Product Name:

Pop valve/pneumatic test bench

Material:

Stainless steel

General Description:

Used to test air compressor components and other pneumatic valves with nitrogen up to 6000 psi

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
