Product Name:

Bc.5in320bc.017blt

Special Features:

Flex-hones are used to prepare the insides of certain holes for non-destructive inspections on aircrafts. They are used to remove scars, gouges etc prior to eddy current automated hole inspection. This flex-honing process is used to reduce the level of signal interference that in turn would reduce the capability of the eddy current inspection to find small cracks; 13galv bc style; 320 grit, boron carbide abrasive; .017 black level 6-12 nylon "s" grade; 2-1/2 inch ap, 8 inch oal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
