Overall Length:

8.062 inches

Wrenching Surface Size:

0.500 inches second end

Features Provided:

Nonmagnetic and nonsparking

Wrenching Surface Shape:

12 point both ends internal

Material:

Copper alloy

Style Designator:

Shallow angular offset double head

Specification Data:

05047-asme b107.100 professional/industrial association standard

Specification Or Standard:

1 type and 1 class

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A527y0
