Overall Length:

3.000 inches

Head Thickness:

0.062 inches

Product Name:

Wrench, holding, stem assembly

Functional Description:

Used to hold the stem assembly when adjusting the screw at the end of the stem assembly during repair of the oxygen regulator

Material:

Steel comp 410

Material Specification:

Qq-s-766 federal specification single material response

Style Designator:

Single head

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A527y0
