Torque Indicating Mechanism:

Plate with pointer

Torque Capacity:

Between 0.0 inch-pounds and 3600.0 inch-pounds

Torque Scale Graduation:

100.0 inch-pounds

Torque Signal Method:

Audible and feel impulse

Drive Surface Size:

0.750 inches single end

Drive End Shape:

Square single end external

Special Features:

Pivoted handle

Material:

Steel

Surface Treatment:

Chromium

Style Designator:

Deflecting frame end drive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A102a0
