End Application:

F100-pw-229

Special Features:

Engine, turbofan, f100 pw-229

Functional Description:

Required to lap the sealing surface of the valve liner which interfaces with the support assembly to prevent leakage

General Description:

Lapping tool consists of a knurled handle and precision machined surface on the metering valve liner; to use the lapping tool: insert downstream end of metering valve into the charged lapping tool; rotate the tool backward and forward; size 1.5 x 6 inch

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
