Overall Length:

6.000 inches

Diameter:

1.000 inches

Operation Method:

Nonimpact

Functional Description:

Tool consists of machined steel installer and seal reforming sections; the installer consists of a body, two pins and a shaft; the shaft is held in place by a pin; slides through the body; reformers are 30 degrees and 60 degree hooks

Material:

Steel

Shape:

Round

Supplementary Features:

During assembly of the compressor inlet variable vane actuating cylinder, a special tool is required to insert, seat, and check the installation of piston ring and preformed packing

Fsc Application Data:

Tool, installation, cap seal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T294-m
