Diameter:

6.900 inches

End Application:

Engine assembly, tf 117 pm100

Operation Method:

Nonimpact

Diameter Across Flats:

6.900 inches

Functional Description:

The number three bevel gear fits snugly in the number three bearing and must be removed during disassembly; due to a tight fit, a mechanical force is needed to separate the bevel gear from the number three bearing

Shape:

Round

Supplementary Features:

Drift, pwa80639, is a weldment consisting of a hardened steel disk and a standard drift handle

Fsc Application Data:

Drift, disassembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
