**End Application:**

Engine assembly tf117 pw100

**Functional Description:**

This drift is used to install theno. 5 bearing plug into the low pressure compressor drive shaft; used for maintenance on the f117-pw-100 engine

**Supplementary Features:**

This drift is a hardened steel weldment consisting of a standard drift handle attached to a machined disk

**Fsc Application Data:**

Drift - no. 5 bearing plug

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T294-m
