End Application:

F-15e aircraft; main landing gearactuating cylinder assembly

Special Features:

The wrench is a face type spannerwrench made from plate stock with two pins protruding from one surface with a 1/2 inch square drive hole between the pins for adapting a torque wrench

Supplementary Features:

Finish: passivate; size: 3.25 x 1.25 x 0.5 (estimated); weight: 0.50 lbs (estimated); design spec: mil-s-8512d (except for para. 3.3.9.4 shall be afactor of safety of 1.5); the piston is held by the fixture while the wrenchprovides the means of removing and installing the floating piston retainer and a means for adapting a torque wrench for final assembly torquing

Fsc Application Data:

Wrench, spanner, face - mlg actuator piston; material: steet

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
